Board of Trustees.

JAMES H. LUCAS, President.

WM. G. ELIOT, D. D., Vice-President.

LUTHER M. KENNETT, Secretary.

JOHN LAUGHTON, M. D.,

JAMES CLEMENS, JR.,

WAYMAN CROW,

HENRY D. BACON,

JAMES E. YEATMAN,

GEORGE PENN, M. D.,

THOMAS ALLEN,

HON. NATHANIEL HOLMES.

FACULTY.

M. L. LINTON, M. D.,

Professor of the Principles and Practice of Medicine.

A. LITTON, M. D.,

Professor of Chemistry and Pharmacy.

CHAS. A. POPE, M. D.,

Professor of the Principles and Practice of Surgery and Clinical Surgery.

M. M. PALLER, M. D.,

Professor of Obstetrics and the Diseases of Women and Children.

JOHN B. JOHNSON, M. D.,

Professor of Clinical Medicine and Pathological Anatomy.

J. T. HODGEN, M. D.,

Professor of General, Descriptive and Surgical Anatomy; Military Surgery and Clinical Surgery at the City Hospital.

J. S. B. ALLEYNE, M. D.,

Professor of Therapeutics and Materia Medica.

E. F. SMITH, M. D.,

Professor of Physiology and Medical Jurisprudence.

E. H. GREGORY, M. D.,

Adjunct Professor of the Principles and Practice of Surgery and Clinical Surgery at the St. Louis (Sisters') Hospital.

J. J. McDOWELL, M. D.,

Demonstrator of Anatomy.

J. T. HODGEN, M. D., DEAN.

ANNUAL CIRCULAR.

1868-69.

The twenty-seventh regular term of Lectures in the St. Louis Medical College will commence on Monday, October 12, 1868, and continue until March 18, 1869.

It is with much pleasure that the Faculty announces the continued and increasing prosperity of this Institution, and it would again embrace the opportunity of presenting to the medical profession and the public its acknowledgments for the generous interest and support which have been so far constantly manifested. St. Louis has now become a center, not only in a commercial point of view, but quite as much in its educational advantages, whether literary or medical; of necessity it is requisite that the educational resources should satisfy the frequent and imperious demands which are being constantly developed.

The medical classes of the past few years have steadily increased in numbers and respectability; students no longer feel that they must seek in Eastern cities facilities for medical study which can as well be obtained nearer home; indeed, the very large classes of older colleges are an embarrassment to the proper and sure advancement of those who are earnestly devoted to the pursuit of medical science. But it needs not to seek at a distance a knowledge of the diseases with which the practitioner in the West is constantly surrounded, nor in general, can the student find alone at the East the opportunities for the study of disease, medical or surgical. It may be safely said, that in St. Louis, with its 250,000 inhabitants, there is illustrated daily, in private or public practice, such a range of pathology as is not much, if any, surpassed by those cities and countries which consider themselves peculiarly favored in their clinical advantages. The surgical, ophthalmic and medical clinics are marked

by the unquestionable number and variety of their cases. It is to this fact, of superior clinical facilities, that the St. Louis Medical College can refer, inviting students to enter upon this field of study as being more easily accessible and making a richer return for the labor expended than can elsewhere be found.

The success of the College hitherto may be attributed to its thorough didactic and demonstrative teaching, and to the ample means of instruction always at its command for spring and summer clinical studies. It is the aim of the Faculty to make them paramount in importance in medical teaching. Too much stress can not be laid on this subject of bed-side instruction; the student can never begin too early to witness for himself the phenomena of disease; the junior student will be always able to glean and treasure up valuable facts, which will assist him to understand and appreciate better the subjects which he meets with in books or listens to at lectures. The Faculty, through its several Professors connected with the different Hospitals, will most willingly use all efforts to elevate in this direction the standard of medical education.

HOSPITALS.

The Hospitals of the city are as well appointed as can be found in other localities of superior clinical facilities; and their size, giving accommodation to thousands of patients annually, affords to the student constant instruction on every subject connected with medicine and surgery.

The City Hospital, a noble monument of the beneficence of the authorities of St. Louis, is most eligibly situated. It is easily accessible by the Fourth street cars, which run directly past the entrance gate. During the period of nine months, from April 1, 1867, to January 1, 1868, there were treated, as is shown by the Resident Physician's report, 2,666 patients, who were afflicted with every kind of medical and surgical disease. This Hospital is visited twice a week throughout the year by Professors J. T. Hodgen and J. B. Johnson, who preside over the surgical and medical clinic, respectively. All of the important surgical operations, as well as those of a minor grade, were performed here during the year. On any week day the student may visit this Hospital, where he will receive, if not from the Clinical Professors, at least from the Resident Physician, every encouragement in the prosecution of his studies.

The St. Louis or Sisters' Hospital, on Spruce and Fourth streets, affords in like manner great advantages for clinical study. From four to five thousand patients are annually treated. Being entirely under the control of the St. Louis Medical College, in so far as relates to the treatment of the patients, its wards are thrown open to the student daily throughout the year. The surgical clinic of Professor E. H. Gregory can not be surpassed in the variety and importance of the cases treated. It is unnecessary to enumerate the major and minor operations of surgery, all of which may be here witnessed by the student who is faithful in the pursuit of his hospital studies; opportunities are frequently afforded to the student to act in the capacity of assistant in the operations that may be performed. Under this clinic, also, numerous uterine diseases are treated, the observation of which is so important to the successful pursuit of this branch of medicine. The Dispensary attached to this Hospital is filled daily by the character of diseases usually found at such an institution; while not so satisfactory as the constant observation of a case at the bed-side from its beginning to its termination, much valuable information can nevertheless be derived, the student gaining considerable practical information by personal examination and prescription. The variety of diseases is equal to what is exhibited in the wards.

In connection also with this Hospital, we desire to call especial attention to the Eye and Ear Clinic, held three times a week, where the student, if he prefer this specialty, can derive as thorough a knowledge of diseases of the eye and ear as can be obtained anywhere in this country. During the last year every variety of these diseases was treated either by prescription or operations; the average daily number of cases being about thirty. From the record book of this clinic are gathered illustrations of inflammation affecting every portion of the optic apparatus; of tumors, of cataracts; of the functional diseases, such as errors of accommodation, diseases of the optic nerve and retina, diseases of the muscles of the eye. This clinic is open to the student at all seasons, and every aid will be furnished him in this practical course.

The Marine Hospital under the charge of Professor E. F. Smith, is likewise in direct relation with the College. The average number of patients treated is five hundred per annum, illustrating surgery as well as medicine.

Other institutions of a similar kind are within the control of the Faculty, and though smaller, yet afford frequent opportunities for clinical study.

It is conceded that these Hospital facilities are equal, if not superior, to those which may be offered elsewhere, because they are available at all times, and not subject to any restriction of fees; because the student is placed in direct relation with the patient, assisting in fact in his treatment, when the over-crowded classes of some popular colleges make "the walking of a hospital" a name indeed, so far as any real experience may be derived. Furthermore, the fact of the exclusive use of two Hospitals may accord to this College some superiority in its means for medical teaching. A summer session, in part clinical, in part didactic, beginning in April and continuing to the end of June, will afford sufficient inducements for students to remain in St. Louis throughout the summer. This course will be continued from year to year, and is open to all without any extra charge. It is gratifying to observe, from the number of students present in the interval of the regular Lectures, that the advantages in St. Louis for the pursuit of the study of medicine are so well appreciated.

Preliminary Lectures at the College building and at the Hospitals will be given by the members of the Faculty during the few weeks preceding Lectures; though not forming a part of the regular course, it is recommended that students should attend them. It is highly desirable that the class should be present at the opening of the session, in order to derive as much benefit as possible from the Lectures.

The resignation of Professor Chas. W. Stevens, who has so long been connected with this College, and who has with so much reputation filled the Chair of Anatomy, has necessitated such changes as, it is believed, will be most advantageous to the Faculty. Professor John T. Hodgen has been transferred from the Chair of Physiology to that of Anatomy. Dr. E. F. Smith, a gentleman of unquestioned medical ability, has been appointed as Professor of Physiology.

PRACTICAL ANATOMY.

Anatomical material is abundant, and the subjects are so prepared that the study of practical anatomy can be pursued not only during the session, but throughout the year. The dissecting rooms are large, well ventilated and

lighted, and supplied with every convenience. This study is considered so important as not to be left to the option of the student, but is insisted on throughout the course, for junior as well as senior students.

TEXT BOOKS.

- Anatomy*.—Wilson, Quain and Sharpey, Horner, Gray.
Chemistry.—Fownes, Graham, Brande and Taylor.
Physiology.—Todd and Bowman, Carpenter, Draper, Dalton, Kirk and Paget.
Therapeutics and Materia Medica.—U. S. Dispensatory, Pereira, Waring, Wood, Stille.
Midwifery.—Churchill, Bedford, Cazeaux, Ramsbotham, Meigs.
Diseases of Women.—West, Bedford, Hewitt, Scanzoni, Thomas.
Diseases of Children.—West, Condie.
Theory and Practice.—Linton, Watson, Aitken, Flint.
Pathological Anatomy.—Rokitansky, Virchow, Paget.
Surgery.—Erichsen, Miller, Gross, Chelius, Fergusson, Hamilton.
Ophthalmology.—Mackenzie, Stellwag.
Medical Jurisprudence.—Taylor, Beck, Elwell.

FEEES.

Fees for the whole course	\$105 00
Matriculation Fee (paid but once)	5 00
Demonstrator's Ticket	10 00
Graduation Fee	20 00
Hospital Tickets, gratuitous.	
Analytical Chemistry, extra.	

The fees must be paid promptly at the beginning of the session. The matriculation ticket must be taken out before any other ticket can be obtained. Remission or reduction of fees, or taking promissory notes from students, is contrary to the regulations of the College. Students may take out tickets for such departments of instruction only as they may desire to attend. Students will be expected to exhibit their tickets to the Dean after the first two weeks of the session. All tickets may be obtained from the Dean. Graduates of other respectable medical schools are admitted to the Lectures on the payment of the matriculation fee. Graduates of this institution have perpetual free admission. Students who have attended two full courses of Lectures in other accredited medical schools will receive all the tickets, including that

for dissections, to the Lectures of this College for seventy-five dollars, exclusive of the matriculation fee.

REQUISITES FOR THE DEGREE OF DOCTOR OF MEDICINE.

1. The candidate must be twenty-one years of age, of good moral character, and must have been engaged in the study of medicine for three years (course of lectures included.)

2. He must have attended two full courses of Lectures in this institution. Attendance on a regular course in some respectable and generally accredited medical school, or four years of reputable practice, will, however, be considered as equivalent to one of the courses above specified. The Dissecting Ticket must also have been taken continuously in this or some other school. He must also have followed the practice of a Hospital.

3. He must undergo a satisfactory examination on all the branches taught in this College, and write an acceptable thesis, in the English, Latin, French, or German language, on some subject connected with medicine.

4. He must, by the first of February, notify the Dean, in writing, of his intention to become a candidate, and deliver to him his thesis and graduating fee; both of which will be returned in case of withdrawal or rejection,

The requirements for an *ad eundem* degree in this College are: A diploma from an accredited medical school; satisfactory testimonials from regular physicians with respect to character and professional standing; an attendance on the Lectures from time to time during the session at which it is desired to graduate; and a satisfactory examination on all branches taught in the College. Candidates for an *ad eundem* degree must matriculate, and pay the graduation fee of twenty dollars.

Boarding, including lights and fuel, can be obtained as usual, in respectable private families, at convenient distances from the College, at as reasonable rates as in other large cities. Students, on their arrival in the city, are requested to report at once to the Dean, at the College, north-east corner of Seventh and Myrtle streets, who will assist them in obtaining board without delay. Letters addressed to any member of the Faculty will receive prompt attention. Alumni of the College, and other medical practitioners, who may desire to receive the Annual Announcement regularly, are respectfully requested to send their names and addresses to the Dean. Any change of residence is also desired. All further information may be obtained by addressing the Dean, or calling at his office, in the College building, northeast corner of Seventh and Myrtle streets.

J. T. HODGEN, M. D., Dean.

GRADUATES, 1868.

The twenty-sixth annual commencement of the St. Louis Medical College was held on the evening of March 2, 1868, in the hall of the Polytechnic Institute, Professor M. M. Pallen conferring the degrees on the following named gentlemen, and Professor E. H. Gregory delivering the valedictory:

NAMES.	RESIDENCE.	SUBJECT OF THESIS.
Brown, Felix Grundy	Beech Fork, Ky.	Phthisis Pulmonalis.
Briscoe, James Marion	Louisiana, Mo.	Pneumonitis.
Baker, Noah Franklin	Liberty Hill, Texas.	Nephritis.
Carson, Jr., William	Palmyra, Mo.	Typhoid Fever.
Carson, Norman Bruce	St. Louis, Mo.	Injuries of the Head.
Coffmann, John Ralph	St. Genevieve, Mo.	Mortality of Children.
Crawford, Cyrus David	Pocahontas, Mo.	Pneumonitis.
Calfee, Justinian Williams	Linn Creek, Mo.	Circulation of the Blood.
East, Samuel Thomas	Troy, Mo.	Hernia.
Farmer, William Rezin	Fredericktown, Mo.	Phthisis Pulmonalis.
Frelingsdorf, Ewald John F.	St. Louis, Mo.	Pneumonia.
Fox, Thomas	Carthage, Ill.	Action and Correlation of Life Forces.
Gordon, Jerry Taylor	Jamestown, Ill.	Fractures.
Garlock, Simeon Elijah	St. Louis, Mo.	Thanatology.
Gregory, James Leo.	St. Louis, Mo.	Physiology of the Blood.
Herndon, Alvin James	Weston, Mo.	Delirium Tremens.
Harris, Edward Rice	Neeley's Landing, Mo.	Remittent Fever.
Harriss, Henry Brown	Cambridge, Mo.	Correlation and Conservation of Physical and Vital Forces.
Horn, Thomas George	Junction City, Kan.	Amygdalitis.
Hayman, Samuel Henry	Monticello, Mo.	Moral Duties of the Accoucheur.
Hays, Edgar Clinton	New London, Mo.	Concussion of the Brain.
Johnson, Horeph	Collinsville, Ill.	Plague.
Jones, Jacob Brummell	Lexington, N. C.	Cholera Infantum.
Jones, Cumberland George	Jacksonville, Ill.	Muriate of Ammonia.
Jackson, James Polk	Labadie, Mo.	Typhoid Fever.
Kirchner, Henry C. A.	St. Louis, Mo.	Catarrh.
Lemen, Edward Clarke	O'Fallon, Ill.	Typhoid Fever.
Moore John James	Linneus, Mo.	Simple Fractures.
Moore, Tilghman Beecher	Belleville, Ill.	Physiological and Pathological Action.

NAME.	RESIDENCE.	SUBJECT OF THESIS.
Mayer, Edward	Duquoin, Ill.	Epidemic Cholera.
McEuen, Henry Gideon	Greenland, Mo.	Dysentery.
O'Reilly, Robert Joseph.	St. Louis, Mo.	Intermittent Fever.
Parsons, Malcolm Graeme	Chester, Ill.	Puerperal Convulsions.
Pettigrew, Samuel	St. Louis, Mo.	Obstetrics.
Reynolds, Michael	Bowling Green, Mo.	Inflammation.
Rhoades, Marcus Morton	New Frankfort, Mo.	Wounds.
Reid, David William	Cambridge, Mo.	Typhoid Fever.
Shaw, Thomas Wilson	Macon, Mo.	Erysipelas.
Sheek, Wiley Fletcher	Clinton, Mo.	Digestion.
Samples, William Robert	St. Louis, Mo.	Anatomy of the Uterus.
Traylor, Josiah Harrell	Bastrop, La.	Inflammation.
Talley, William Compton	Missouri.	Pneumonitis.
Tyndale, Julius Hilgard	Springfield, Ill.	Pyæmia.
Thornton, Thomas R.	New Santa Fe, Mo.	Phthisis Pulmonalis.
Watson, Cornelius	Toronto, Canada W.	Signs of Pregnancy.
West, Washington	Belleville, Ill.	Diagnosis of Tumors.

The *ad eundem* degree was conferred upon the following gentlemen :

James F. Bruner, M. D.....	St. Joseph, Missouri.
Matthew W. Hall, M. D.....	Saline county, Missouri.
O. F. Renick, M. D.....	Wellington, Missouri.
James N. Coons, M. D.....	Shelbyville, Missouri.
J. P. H. Gray, M. D.....	California, Missouri.
E. E. Waggoner, M. D.....	Shelbyville, Illinois.
